Subject: Require Vaccines for students 12+
Date: Friday, August 27, 2021 5:02:08 PM

When are you going to require COVID vaccines for students 12 and over in NV public schools? You can't on-one-hand tell the public that the only way to get past COVID is to have everyone get vaccinated and on-the-other-hand not use the authority the Board has to require students to be vaxxed. Please step up. Your delaying society's ability to get passed the pandemic. Require vaccines now! What is the Board waiting for? More sickness? More death? More long haul COVID for school staff exposed and non-vaxxed kids exposed? More variants to emerge?

The time has long passed to act! Please do your jobs as public health officials. Do the right thing and require vaccines now w/no flaky exemptions.
