Subject: Opposing proposed vaccine mandate
Date: Wednesday, August 18, 2021 9:47:17 AM

Hello,

I want to let you know that I am opposed to any proposal that mandates masks or vaccines for anyone, especially for any educational institution. Young people are not in danger from any of these diseases, especially Covid 19 or any variant that is forthcoming. The Delta variant is no more dangerous than the Covid-19 virus, which is 99.9% recoverable! We all know that all these mandates are just political in nature and do nothing for young people. Please examine the **true data** about how harmful these vaccines are to everyone! Do not harm our young people by forcing an unapproved gene therapy into their bodies. Thank you.

Sincerely,

Cindy Olivieri
