Subject: SEPT. 1ST MTG; MANDATING COVID VACCINATION OF CCSD EMPLOYEES
Date: Monday, August 30, 2021 12:34:40 PM

My name is Aniko Kovacs. I am a first generation American of two proud Hungarian parents and a long line of Hungarians who survived the holocaust, fought against communism, who chose to come here for freedom and I will be recorded as a FIRM NO to mandating this "vaccine" for our CCSD employees.

BOTTOMLINE

It is not my place to decide, as I am not anyone's physician, priest, nor am I responsible for anyone else but myself and my family. NOR IS IT YOUR PLACE to decide. It should be up to each employee to decide for themselves and with their physician if they are to take this vaccine at any point in time.

This should REMAIN AS FREEDOM OF CHOICE.

Second, I implore you to look at all the data, all studies that overwhelmingly support NOT to be forcing vaccinations on anyone. Esp. when the same entities pushing for these mandates do not support these vaccinations alone (booster shots needed now) nor has proven that these are effective for the variants to come (due to vaccinated that helped the virus adapt to new variant(s)).

A vaccine is not designed to cease a virus' ability to be transmissable. All the vaccines the district requires of our kids are not designed to stop transmission only personal side effects.

This "vaccine" has only passed the first round of its testing stage. It is not a fully approved vaccine by the FDA. still under a continuance of EUA.

With many young teachers, there is still no indication of what long term affects they will suffer if they decide not to quit if this is passed. Which our district is SUFFERING from the lack of personnel we need for our kids and district as a whole.

We cannot forget about the short term affects of this vaccine. There have been deaths, hospitalizations of being infected with covid after and vaccine injuries which we have personally known. Japan has banned the use of the Moderna Vaccine because there has been deaths already and they have found high levels of a metal that all these 5g towers we have, are interfering and affecting those who have recieved it. We are seeing all these Outbreaks happening where the vaccine has been pressed the hardest...

The only thing that I will ever mandate of our employees is that they are the best for the job and follow through.

We are in no place to create a bigger problem in this district than what we are already facing. Employees will be awaiting for their termination if you mandate this vaccine, and currently you cannot even uphold the Nevada Law of our kids attending school as I am still waiting on a teacher for my daughter. You are currently leaving children alone at bus stops or school waiting hours. You are already risking our kids safety and withholding them from getting the

education they deserve. As one of the highest funded/cost of schools districts we are failing our kids being last in this nation. Teachers, bus drivers and all other employees because you are not doing your jobs focusing on what is at hand and within your reach that will make the positive difference that we need without stepping on people freedoms with something uncertain, unstable, and the taking away their choice for the personal health risks that they will have to face and suffer. Not you. It is not your choice to make. You are not health advocates or proxies for your employees who are healthy and sound of mind and ONLY THEY have the power to chose over their health.

This is an overreach. Your employees need you to stand up better for them and help them get the resources they need not take away everything they have worked for or waste the work they have put in. This is not a common goal. This will not get us to where we need to go. And there is no science or moral to justify mandating this "vaccine" that isn't working as effectively as they have made you believe and is causing harm to many. Stop rushing and pushing this science that is changing every single day.
