Public Comment:

Our daughter is part of a High School (Early College) Program. She is enrolled in Nevada State High School. The program allows her to take classes at CSN and other colleges. Would this vaccine mandate apply to her? Or would the High School kids be in a protected group? We would have not signed her up for this college program had we known this vaccine would be required. At this point, there must be the option to opt out of the vaccine. Our daughter is a minor and does not want the vaccine.

Please protect our youth and their rights.

Thank you,

Mardell Cox
