Subject: Mandatory Covid 19 Vaccine in schools?
Date: Thursday, August 19, 2021 12:02:01 PM

August 19, 2021

Dear Sir or Madam,

I am writing you today in regards to the proposed vaccine mandate in schools.

I want my voice to be heard that I am completely and totally OPPOSED and AGAINST this.

Please allow me to explain myself.

1. These "vaccines" have not been rigorously tested for 2 years, like every other proposed medicine that attempts to be on the market. They are not an actual vaccine like Meningitis, Polio, Measles, Mumps, Rubella, Whooping Cough, Diphtheria, Pertussis, or Varicella.

Rather it is an attempt at a "treatment" for Covid symptoms. NOT a 100% cure that ends it.

I clearly don't have a problem vaccinating my children with actual PROVEN and TESTED vaccines.

I am not an "anti-vaxxer" and my kids are both up to date on their real vaccines. But this Covid 19 thing, is NOT a vaccine at all. Its a treatment only. And not a very good or safe one at that.

2. This "vaccine" is still not FDA approved.

They don't want to approve it because they know its dangerous!

In animal testing, they couldn't even get the ANIMALS to live for over a week. A WEEK! So they gave up and tried bigger animals. Again, they kept dying so that was scrapped too. So if animals couldn't handle it, they tried it on human beings. They stayed alive longer than the animals but for how long? Some people have DIED as a result of this experimental "vaccine."

(You can find those numbers hidden deep in CDC reports.)

I DO NOT WANT MY KIDS or anyone's kids TO DIE BECAUSE OF THIS.

WE don't know exactly what's in it but if it KILLS people, regardless of age, IT'S NOT SAFE TO BE USING.

3. This "vaccine" was given the OK to administer as an EMERGENCY USE only. Now as far as I know, we are no longer technically in an Emergency. The Governor GAVE BACK his emergency powers to the counties as of May 1, 2021. I know this for a fact as I was a "Compliance Ambassador" at the City of Las Vegas at the time. My job was to make sure City of Las Vegas businesses were in compliance with masks, social distancing and signage. We had DAILY briefings as to what was going

on with the mandates, rules and any other new information from the governor's Covid task force we needed to be aware of.

4. This "vaccine" comes with small print that no one is really aware of.

The government KNEW how dangerous this was and made sure to add in that NO ONE who administers, the doctors, the makers or government can be sued if anyone dies as a result of the vaccine.

So basically, if your family member, or your own child dies because of this, you have no recourse--not with the doctor, the government or the company that administered it.

BUT--if the CCSD mandates this "vaccine," irate and grieving parents will be coming after YOU because these were YOUR RULES and they were just complying with your rules to keep their kids in school.

And for those parents who can't pull their child out and home school them because of this ridiculous mandate, they will blame YOU if anything happens to their kids.

If this "vaccine" mandate comes to fruition, you can bet that myself, and many other parents will be pulling their kids out of public school, and there goes your per student funding!

5. We TRUST in you to help educate our children. We trust you to keep them safe at school--such as in the case of a fire, injury or even a shelter in place issue.

But we NEVER gave you permission in regards to their healthcare. That is our job as parents.

Two years ago, when kids were still in school full time and face to face, the district wouldn't even give them a Tylenol let alone ANY medicine. And now you want everyone to take this "vaccine?"

And you wonder why even your teaching staff would rather wait in line for hours to get tested than take this "vaccine" the government cooked up? EVEN THEY DON'T WANT IT but you want our kids to take it?

6. Anyone with half a brain can remember the start of EVERY SCHOOL YEAR (before 2019),

everyone got sick. Teachers, students and even parents. That was part of life. We knew it was coming.

We got sick with anything the school petrie dish had to offer.

PEOPLE ARE GOING TO GET SICK. There's no way around that.

Every August/September and every December/January kids, parents, teachers, PEOPLE got the flu or a cold.

Did they die? NO.

Did they get better and move on with life? YES.

But we've kept everyone cooped up in their houses for 2 years--OF COURSE the first thing you're going to do when you get out in the world is GET SICK. You haven't been around any germs whatsoever, so of course you'll catch something. That's the way it's ALWAYS WORKED.

7. Not too long ago, the media was telling us that Covid 19 and the flu are very similar so it's difficult to tell them apart without testing. Maybe you should read that again.

COVID 19 AND THE FLU ARE VERY SIMILAR SO IT'S HARD TO TELL THEM APART.

So let me ask, do you require ALL students at ALL schools to have a yearly flu shot? No? That's up to the parents? Hmm. Well this should be too.

The school district with the help of the government has seriously overstepped their boundaries here.

We have heard time and again how school aged children are not at risk for Covid -- unless there are issues with them already being immune compromised.

This whole "vaccine" issue is ridiculous and shouldn't even be a conversation. According to doctors who are not afraid to talk about this, this thing they cooked up in a lab is UNSAFE, It's NOT PROVEN. It does more harm than good. And frankly to me and many parents out there, if you mandate this in schools, you're OK with killing kids. OUR KIDS. YOUR STUDENTS. And you're OK with this? Good lord I hope not.

Finally, I beg of you NOT to uphold this mandatory "vaccine" issue in schools. PLEASE stand up and say no.

As a parent who gladly volunteered my time at my children's schools for 7 years, was a PTA member for 2 years and still are friends with many of the teachers, I applaud them for standing up and not taking this "vaccine."

I want my friends safe. I want my children safe. BUT THIS IS NOT THE WAY TO DO IT.

This would be overstepping in the worst way. I don't think that ANY entity out there should mandate this.

It's not safe and it's not working anyways! New variants keep popping up that this doesn't protect against--so why bother again?

Nevadans are smart people.

We know where to get it IF we want it. We don't need pop ups all over town. If we want it we'll stop and get it. If not, we'll just keep on driving. No amount of bribery by the state officials is going to make us want to get it if we don't want it.

Same goes for our kids. If we as parents don't want it, we're not going to force our kids to. And if they are forced BY YOU to have it in order to attend school, I will definitely be withdrawing my kids out of public school.

This whole thing is unconstitutional and wrong.

Sincerely,

Jennifer Boisvert
Parent of a Sophomore and Senior in High School

God Bless the USA and God Bless us All.
