---

Not only is it a violation of rights to force/mandate a vaccine it has been proven unsafe. I have been told by many doctors that i asked if I or my children should get it and that we should not. Our personal reasons being that my family has a history of blood clots and both options for vaccine could kill myself or my children by giving us blood clots. Also that the vaccine only lasts a few months and then you are susceptible again. As well as there are people who have been vaccinated and are still catching the virus. Please do not force this or mandate the vaccine on families. You may cause people to lose a parent, child, grandchild and so on all because of the government being on a power trip. We are not Cold War Russia. We are not WW2 Germany. We the people have rights and a constitution to back us, which the new generation won't have a clue on how to read thanks to the government mandating that learning cursive should no longer be taught. This is just outrageous. I feel bad for the good teachers losing jobs due to parents who would rather home school than submit to the governments ridiculous demands. Thank you for your time.
