Subject: Mandating vaccines is wrong.
Date: Thursday, August 19, 2021 2:44:31 PM

To whom it may concern:

It was brought to my attention that the Nevada School Board of Health is having a meeting on Friday August, 20th and in such meeting there will be discussions about whether to mandate vaccines for students or not.

First of all, your board does not have the authority to mandate such thing. In this country, the United States of America, the ultimate law is the constitution, and the whole purpose of our constitution is to prevent government entities and government officials like yourselves from doing the very thing you are discussing on Friday.

You have no legal right to do so.

Conversations about whether children should be vaccinated or not should be happening in home's living rooms. Parents should be making those decisions for their children. NO ONE ELSE! It is absolutely ridiculous that your board thinks that you are doing the community a service and that you are protecting OUR children. Who are you to have any power whatsoever over MY children? Wake up. You are not helping anybody. You should be ashamed of what your board is trying to do, and as individuals I beg you that you find your integrity and stand against this mandate. You members are all individuals. You are free to choose. You are not owned by anyone or any entity. The decisions that you make, only you will have to live with them.

You know that this is all crazy. Why mandate a vaccine that hasn't had enough testing when data is showing horrific side effects including death, autoimmune diseases, neurological trauma and many more. Why mandate such a thing in children that have a higher percentage of recovering from Covid-19 than the percentage they have from recovering from the flu. There has never been a mandate for flu vaccinations. This is crazy and you know it. We are talking about families and parents that love, provide and raise their children. Parents that will give their lives for their children. We are not talking about neglecting families or children that need your "protection".

Parents will not keep quiet. You will not vaccinate my children.

This responsibility does NOT fall on you. That is mine and my husband's decision. MY CHILD, MY DECISION.

Stand up for Nevadans and do the right thing.

NO VACCINE MANDATE!

Dayaisi Collado
A concerned Nevadan parent.
