Subject: Mandatory shots
Date: Friday, August 20, 2021 7:10:33 AM

Good morning,
I understand you are considering making the Covid shot mandatory.

Studies clearly show that Covid has an extremely high survival rate, particularly for the younger population. While the CDC and Fauci bounce around on best practices, the science remains clear.

The Constitution and The Bill of Rights provide the only set of governing laws that are needed regarding personal rights vs. “man”dated “authorized” injections. Mind you they are not even FDA APPROVED!!!!

Further, I assure you that should any young adult have adverse effects or worse, loss of life due to forced experimental jabs, there will be grave consequences for each and every person involved. There are no statutes you would be able to hide behind. There would be no stopping grieving parents from relentless pursuit of justice.

You are not GOD, do not pretend to be. This shot is NOT FDA approved and should NOT be mandated by anyone. There will be severe and unrelenting consequences should you choose to pursue forcing this on anyone.

I strongly urge you to reject making this jab a requirement for anything. You are replaceable at your position and making the wrong decision will permanently haunt you.

Thank you for taking the time to read this.
