Subject: Mandatory COVID vaccination for students
Date: Thursday, August 19, 2021 8:35:40 PM

I would like to log my opposition to mandatory COVID vaccination for students of any age. At this point they are still experimental and it would not be legal or moral to require anyone to get them let alone our children. If an adult chooses to get the vaccine they have hopefully thought it through on their own and understand the risks and rewards of their actions. That is not the case for our children. We still don't know the long term affects it could have on our bodies. Please, don't make this political because it shouldn't be and don't make it financial. Do the right thing and not mandate a NEW EXPERIMENTAL drug on our children. It won't be eradicated. We have to learn to live with it. Thank you
