Subject: NO Mandatory Vaccine for college students
Date: Thursday, August 19, 2021 5:24:24 PM

Hello , I'm against mandatory vaccines for college student or any persons .
This experiment causes deaths and illnesses that are censored from being exposed to us .
Scientists, doctors , virologists have come out to say mass vaccination has never cured anything - most if not all of these experts have been banned .
Informed consent has been thrown out the window for something that can be cured when proper measures are taken .
. Young adults and children are typically ones who have strong immune systems and can survive Covid and flu's.
It is illegal to force mandatory experimental medical devices upon society . No legal action can be taken towards the vaccine companies since 1985 — if our children become ill, or die , there is no recourse .
Our children are so precious to us , why take any chances on their health and future.
Sincerely- Dorothy
