Subject: COVID VACCINE FOR KIDS
Date: Friday, August 20, 2021 8:15:20 AM

Hello,

My name is Austyn Layton,

I am a mother of a little boy, and we became aware that they are trying to mandate a forced vaccine on our children at schools no matter what religious beliefs we have which clearly violates our freedoms as Americans. We should have a choice if we decide whether or not we believe our children should have foreign substances injected into their bodies, which is my main concern, in our religion we do not believe foreign matter, chemicals should be injected into the body. Especially a vaccine which has not been on the market for even one year and is considered experimental. We will agree to wear the masks and have agreed to many procedures in the last year, but this is one mandatory procedure that is starting to affect our natural living orders. If we have any voice at all as a Nevadan, I would hope that you consider these freedoms that you are taking away. So much as to the point where we will move away from here if such enforcements are made. We will not be bullied into going against our religious beliefs because of a vaccine.

Thank you,
Austyn Layton
