Subject: Vaccinations for college students
Date: Sunday, August 22, 2021 5:40:27 PM

I am writing to adamantly oppose mandating vaccinations for Nevada college students or any other students in our state for the following reasons:

- This is clearly a violation of their Constitutional rights;
- It is a violation of the Nuremberg Code;
- It is in conflict with the results of the Covid-19 and Delta spread;
- The vaccines have not been proven, no matter if the FDA approves the Pfizer vaccine as it has been proven to cause neurodegenerative disease, and is that what we want to inflict on our young people;
- It is those who have been vaccinated who are now spreading the virus due to the reaction after approximately 5-6 months;
- The vaccines are causing death - more than the total deaths from vaccines for the last 30 years;
- The vaccines are causing debilitating injuries causing permanent disabilities in many, heart inflammation in young men; miscarriages in women in their first two trimesters;
- Many have had Covid, so they have natural immunity and the vaccine could cause major issues;
- There are proven safe and effective treatment protocols (ivermectin and hydrochloroquin) and the rejection of these drugs have caused hundreds of thousands of deaths that could have been prevented, but for making the drug companies billions in profits; and they have saved tens of thousands where the CDC, Fauci, big media do not quash their use.
- The vaccines are as low as 39% effective (Pfizer) and yet cause major side effects.

The effective protocols are to treat those in the high risk groups - elderly with health conditions, for example; get rid of masking as it does not work, except to prove to the people that the government can mandate.

The variants will continue spreading out of control unless the vaccinations stop, as it is the vaccinations that are causing the variants to develop. Please begin to listen to all the expert doctors on the outcomes of these "vaccinations" that have not been adequately tested, yet are now going to be used on young people, who have already died taking the vaccines. And for God's sake do not try to force it onto young children either.
