Dear Dr. Jon Pennell, DVM; Dr. Jeffrey Murawsky, MD; Dr. Trudy Larson, MD; Dr. Monica Ponce', DDS; Judith Bittner and Charles Smith,

I am contacting you today about any current or future consideration by the Nevada Board of Health to require that children receive COVID vaccines as a requirement for school enrollment and attendance in the state of Nevada. I strongly oppose any such measure and remind you that these vaccines are currently not approved for uptake in children ages 5-17 by the United States Food and Drug Administration (FDA); rather they have been authorized by the FDA under an Emergency Use Authorization (EUA). Per federal law as referenced below, any product licensed under an EUA requires that citizens and therefore in the case of minor children, their parents/legal guardians, have the option to accept or refuse the product.

Subject: Vaccine for children 5-17
Date: Monday, November 29, 2021 4:17:39 PM

WARNING - This email originated from outside the State of Nevada. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Dr. Jon Pennell, DVM; Dr. Jeffrey Murawsky, MD; Dr. Trudy Larson, MD; Dr. Monica Ponce', DDS; Judith Bittner and Charles Smith,

I'm contacting you today about any current or future consideration by the Nevada Board of Health to require that children receive COVID vaccines as a requirement for school enrollment and attendance in the state of Nevada.

I strongly oppose vaccines for children ages 5-17. The United States Food and Drug Administration (FDA); has not approved the current vaccines, rather they have been authorized by the FDA under an Emergency Use Authorization (EUA). Per federal law as referenced below, any product licensed under an EUA requires that citizens, (in the case of minor children, their parents/legal guardians), **have the option to accept or refuse the product.** The Emergency Use Authorization of Medical Products and Related Authorities Guidance for Industry and Other Stakeholders January 2017, is located at the following internet address: <https://www.fda.gov/regulatory-information/search-fda-guidance-documents/emergency-use-authorization-medical-products-and-related-authorities>

In part, you will find the following: Section E: Conditions of Authorization; 1. Information relating to the EUA Product; b. Information for Recipients: "the statute requires that FDA ensure that recipients are informed to the extent practicable given the applicable circumstances.....**That they have the option to accept or refuse the EUA product**" I'm sick at heart at the way our laws are being ignored. Please don't add to the lawlessness of this pandemic. Give parents their rights back.

Best Regards,
Lorraine Conyac

Dear Dr. Jon Pennell, DVM;
Dr. Jeffrey Murawsky, MD;
Dr. Trudy Larson, MD;
Dr. Monica Ponce', DDS;
Judith Bittner and Charles Smith,

I am contacting you today about any current or future considerations by the Nevada Board of Health that would require children receive COVID vaccines as a requirement for school enrollment and attendance in the state of Nevada. I strongly OPPOSE any such measure.

In case you are not aware, or have forgotten, these vaccines are NOT approved for children ages 5-17 by the United States Food and Drug Administration (FDA). The covid vaccines are only authorized by the FDA as part of an Emergency Use Authorization (EUA). Per federal law, as referenced below, any product licensed under an EUA requires that citizens, and in the case of minor children, the parents/legal guardians, have the option to accept or refuse the product.

Emergency Use Authorization of Medical Products and Related Authorities Guidance for Industry and Other Stakeholders January 2017 <https://www.fda.gov/regulatory-information/search-fda-guidance-documents/emergency-use-authorization-medical-products-and-related-authorities>

Section E: Conditions of Authorization; 1. Information relating to the EUA Product; b. Information for Recipients: "the statute requires that FDA ensure that recipients are informed to the extent practicable given the applicable circumstances.....That they have the option to accept or refuse the EUA product."

I have attached an image and a link for the legal code for EUA's under section 564 of the FD&C Act 21 U.S.C. 360bbb-3.

[https://uscode.house.gov/view.xhtml?req=\(title:21 section:360bbb-3 edition:prelim\) OR \(granuleid:USC-prelim-title21-section360bbb-3\)&f=treesort&num=0&edition=prelim](https://uscode.house.gov/view.xhtml?req=(title:21 section:360bbb-3 edition:prelim) OR (granuleid:USC-prelim-title21-section360bbb-3)&f=treesort&num=0&edition=prelim)

You will find this in the section for 'Conditions of Authorization'.

"...the option to accept or refuse administration of the product, of the consequences, if any, of refusing administration of the product, and of the alternatives to the product that are available and of their benefits and risks."

Ivermectin is a better option to treat covid 19 illness than an EUA injection, in which we do NOT know the long term effects of. No one knows yet if this injection will or will not cause

infertility in our children. The risk of death in children is statistically 0%. If you research the mortality rates on the CDC website, you will see that the Flu and covid have the same level of risk for children.

The benefits and risk and logic should prevail. The risks associated covid 19 vaccines are FAR greater than natural infection of covid 19 in children.

Do the right thing. Do not put our children at risk of severe possible side effects and possible future infertility, for an illness they quickly recover from and can be treated with ivermectin.

Best Regards,

Heather Kamami

A mandate is not a law. Coercion and experimenting violates the Nuremberg Code. All we

have seen in this state is Tyranny via “mandates” which is not a law and coercion via propaganda and fear tactics. The people pushing this have even stated we have to inject the children to see how it will work and what effects it will have. Look at the numbers for still births from pregnant mothers who have taken it. Look at the VAERS data. Look at how many young athletes have dropped on the field. This is genocide and it needs to stop now. Kids have never been effected by this. There is ZERO reason to push these bioweapon injections on them and forever effect their lives.

This document explains what it’s really about and it’s very criminal. This has nothing to do with health. This document is by Dr. David Martin and lays it all out.

The Supremacy Clause of our Constitution which our State has violated with their “emergency powers/mandate”.

Best Regards,

Michelle Austin

Have a blessed day

The Criminal Conspiracy of Coronavirus

Dr. David E. Martin

Throughout the decade of the 90s Pfizer sought to research, develop and patent a coronavirus (CoV) vaccine. Their first patent filing specifically recognizing the S-protein as the immunologic target for vaccines was filed on November 14, 1990 (U.S. Patent 6,372,224). With a focus on swine and canine gastroenteritis, these efforts showed little commercial promise and the patent was abandoned in April of 2000. During the same period, the National Institute for Allergy and Infectious Disease (NIAID) under the vaccine obsession of Dr. Anthony Fauci, funded Professor Ralph Baric at the University of North Carolina Chapel Hill. This program designed to commercially weaponize a naturally occurring toxin is the beginning of the criminal conspiracy and **violates 18 USC § 175, 15 USC § 1-3, and 15 USC § 8**) Dr. Baric's expertise was understanding how to modify components of the coronavirus associated with cardiomyopathy. NIAID Grants AI 23946 and GM63228 (leading to patent U.S. 7,279,327 "Methods for Producing Recombinant Coronavirus") was the NIH's first Gain-of-Function (GOF) project in which Dr. Baric created an "infectious, replication defective" clone of recombinant coronavirus. This work clearly defined a means of making a natural pathogen more harmful to humans by manipulating the Spike Protein and other receptor targets. A year after filing a patent on this GOF CoV, the world experienced the first outbreak of Severe Acute Respiratory Syndrome (SARS).

Under the guise of responding to a public health emergency, the United States Centers for Disease Control and Prevention (CDC) filed a patent application on the genome of SARS CoV on April 25, 2003. Accessing and manipulating the genomic data (which came from China making an "invention" claim by a U.S. entity illegal **violating 35 USC ng 35 USC §101, 103**), Dr. Baric, Dr. Fauci, and the CDC **violated 18 USC § 175** (a felony). One year earlier, Dr. Baric and his team had already filed a patent which clearly the pathogen CDC claimed as novel in 2003. Three days after filing a patent on the genome, NIH-funded Sequoia Pharmaceuticals filed a patent for the vaccine on the virus invented a mere three days earlier. At the same time, in **violation of 15 USC § 19** Dr. Fauci was appointed to a board position with the Bill and Melinda Gates Foundation (a competitor in vaccine manufacturing) thereby beginning the interlocking directorate¹ anti-trust crime.

In 2005, the DARPA and MITRE hosted a conference in which the intentions of the U.S. Department of Defense was explicit. In a presentation focused on "Synthetic Coronaviruses Biohacking: Biological Warfare Enabling

¹ We note that gain-of-function specialist, Dr. Ralph Baric, was both the recipient of millions of dollars of U.S. research grants from several federal agencies and sat on the World Health Organization's International Committee on Taxonomy of Viruses (ICTV) and the *Coronaviridae* Study Group (CSG). In this capacity, he was both responsible for determining "novelty" of clades of virus species but directly benefitted from determining declarations of novelty in the form of new research funding authorizations and associated patenting and commercial collaboration. Together with CDC, NIAID, WHO, academic and commercial parties (including Johnson & Johnson; Sanofi and their several coronavirus patent-holding biotech companies; Moderna; Pfizer; Merck; BioNTech; AstraZeneca; Janssen; Ridgeback; Gilead (Dr. Baric's alter ego); Sherlock Biosciences; and others), a powerful group of interests constituted what are "interlocking directorates" under U.S. anti-trust laws. Further, most of these entities, including the Federal Government ones **violated 35 USC § 200-206** by failing to disclose Federal Government interest in the remedies proposed.

These entities were affiliated with the WHO's Global Preparedness Monitoring Board (GPMB) whose members were instrumental in the Open Philanthropy-funded global coronavirus pandemic "desk-top" exercise EVENT 201 in October 2019. This event, funded by the principal investor in Sherlock Biosciences (a beneficiary of the SARS CoV-2 EUA for CRISPR technology) and linking interlocking funding partner, the Bill and Melinda Gates Foundation into the GPMB mandated a respiratory disease global preparedness exercise to be completed by September 2020 and alerted us to anticipate an "epidemic" scenario. We expected to see such a scenario emerge from Wuhan or Guangdong China, northern Italy, Seattle, New York or a combination thereof, as Dr. Zhengli Shi and Dr. Baric's work on zoonotic transmission of coronavirus identified overlapping mutations in coronavirus in bat populations located in these areas.

Technologies”, Dr. Baric presented the malleability of CoV as a biological warfare agent. **Violating 18 USC § 175** and inducing the non-competitive market allocation (**violating 15 USC § 8**) for years to follow, Dr. Baric and the U.S. Department of Defense spent over \$45 million in amplifying the toxicity of CoV and its chimeric derivatives.

From 2011 until the alleged COVID-19 pandemic, Dr. Fauci has routinely lamented about the inadequacy of public funding for his vaccine programs and the public’s general unwillingness to succumb to his insistence that every MUST be vaccinated against influenza. Despite repeated appropriations to advance vaccine dependency, his efforts have been largely unsuccessful. NIAID – under Dr. Fauci’s direct authorization – encouraged UNC Chapel and Dr. Baric’s lab to ignore the GoF moratorium in a letter dated October 21, 2014. At that time, Drs. Fauci, Baric and EcoHealthAlliance’s Peter Daszak were in possession of an extremely dangerous Chinese pathogen identified a year earlier in Wuhan.²

While many illegal acts were committed by the conspirators leading up to 2015, the domestic terrorism program (**in violation of 18 USC § 2339**) was announced by NIAID-funded Daszak at the National Academy of Sciences. Here, he announced what was to become the domestic and global terrorism event branded COVID-19.

*“...until an infectious disease crisis is very real, present, and at an emergency threshold, it is often largely ignored. **To sustain the funding base beyond the crisis, he said, we need to increase public understanding of the need for MCMs such as a pan-influenza or pan-coronavirus vaccine. A key driver is the media, and the economics follow the hype. We need to use that hype to our advantage to get to the real issues. Investors will respond if they see profit at the end of process, Daszak stated.**”³*

It is not surprising that one year later NIAID’s funding paid off with Dr. Baric’s lab announcing that the Wuhan-derived pathogen was “poised for human emergence”.⁴

Knowing that the U.S. Department of Health and Human Services (through CDC, NIH, NIAID, and their funded laboratories and commercial partners) had patents on each proposed element of medical counter measures and their funding, Dr. Fauci, Dr. Gao (China CDC), and Dr. Elias (Bill and Melinda Gates Foundation) conspired to

² By October 2013, the Wuhan Institute of Virology 1 coronavirus S1 spike protein was described in NIAID’s funded work in China. This work involved NIAID, USAID, and Peter Daszak, the head of EcoHealth Alliance. This work, funded under R01AI079231, was pivotal in isolating and manipulating viral fragments selected from sites across China which contained high risk for severe human response. (Ge, XY., Li, JL., Yang, XL. *et al.* Isolation and characterization of a bat SARS-like coronavirus that uses the ACE2 receptor. *Nature* **503**, 535–538 (2013).) The GoF work NIAID allowed to persist in the face of the moratorium was Dr. Baric’s work with this pathogen

⁴ Menachery VD, Yount BL Jr, Sims AC, Debbink K, Agnihothram SS, Gralinski LE, Graham RL, Scobey T, Plante JA, Royal SR, Swanstrom J, Sheahan TP, Pickles RJ, Corti D, Randell SH, Lanzavecchia A, Marasco WA, **Baric RS**. 2016. *SARS-like WIV1-CoV poised for human emergence*. **Proc Natl Acad Sci U S A**. 2016 Mar 14. pii: 201517719

commit acts of terror on the global population – including the citizens of the United States – when, in September 2019, they published the following mandate in **A World At Risk**:

“Countries, donors and multilateral institutions must be prepared for the worst. A rapidly spreading pandemic due to a lethal respiratory pathogen (whether naturally emergent or accidentally or deliberately released) poses additional preparedness requirements. Donors and multilateral institutions must ensure adequate investment in developing innovative vaccines and therapeutics, surge manufacturing capacity, broad-spectrum antivirals and appropriate non-pharmaceutical interventions. All countries must develop a system for immediately sharing genome sequences of any new pathogen for public health purposes along with the means to share limited medical countermeasures across countries.

Progress indicator(s) by September 2020

- *Donors and countries commit and identify timelines for: financing and development of a universal influenza vaccine, broad spectrum antivirals, and targeted therapeutics. WHO and its Member States develop options for standard procedures and timelines for sharing of sequence data, specimens, and medical countermeasures for pathogens other than influenza.*
- *Donors, countries and multilateral institutions develop a multi-year plan and approach for strengthening R&D research capacity, in advance of and during an epidemic.*
- *WHO, the United Nations Children’s Fund, the International Federation of Red Cross and Red Crescent Societies, academic and other partners identify strategies for increasing capacity and integration of social science approaches and researchers across the entire preparedness/response continuum.”⁵*

As if to confirm the utility of the September 2019 demand for “financing and development of” vaccine and the fortuitous SARS CoV-2 alleged outbreak in December of 2019, Dr. Fauci began gloating that his fortunes for additional funding were likely changing for the better. In a February 2020 interview in **STAT**, he was quoted as follows:

“The emergence of the new virus is going to change that figure, likely considerably, Fauci said. “I don’t know how much it’s going to be. But I think it’s going to generate more sustained interest in coronaviruses because it’s very clear that coronaviruses can do really interesting things.”⁶

In November 2019 – one month before the alleged “outbreak” in Wuhan, Moderna entered into a material transfer agreement – brokered by the Vaccine Research Center at NIAID (at which UNC Chapel Hill alum Dr. Kizzy Corbett worked – to access Dr. Baric’s Spike Protein data to commence vaccine development. In his own written statement obtained by the **Financial Times**, he refers to this agreement as being the foundation for the mRNA Moderna vaccine.⁷

To finalize the nature of the racketeering and anti-trust criminal conspiracy, when it came time to commercialize the NIH and DARPA owned spike protein and pass it off as a “vaccine” (in conflict with the standard for vaccines in statutory and scientific application), the Operation Warp Speed contract was awarded to DoD contraction ATI, a subsidiary of ANSER. In a graph reminiscent of the anti-trust hearings at the formation of the Clayton Act in the early 20th century, the identify of the interlocking conflicts of interests are presented in graphic relief. It is with no surprise that the result of this price-fixing conspiracy was the enrichment of the conspiring parties and the harm of consumers.

⁶ <https://www.statnews.com/2020/02/10/fluctuating-funding-and-flagging-interest-hurt-coronavirus-research/>

⁷ <https://pubmed.ncbi.nlm.nih.gov/32756549/>

Indeed, *the money followed the hype* and they *used the hype to get to the real issues*. *Investors follow where they see profit at the end of the process*.

And real Americans are dying each day because a criminal organization unleashed terror resulting in the deaths of Americans.

18 U.S.C. § 2331 §§ 802 – Acts of Domestic Terrorism resulting in death of American Citizens

Pub. L. No. 107-52 expanded the definition of terrorism to cover "domestic," as opposed to international, terrorism. A person engages in domestic terrorism if they do an act "dangerous to human life" that is a violation of the criminal laws of a state or the United States, if the act appears to be intended to: (i) intimidate or coerce a civilian population; (ii) influence the policy of a government by intimidation or coercion;

Every single Act, the declaration of the State of Emergency, the Emergency Use Authorization, the fraudulent face masks, the business closures, and the OSHA and CMS vaccine mandates are ALL admitted by the conspirators to be acts to coerce the population into taking a vaccine. They announced it in 2015, they prepared the pathogen in 2016, and laid out the terror campaign in September 2019. And now they profit from the death of Americans.

Subject: forced vaccines will mean parents removing children from the public school system
Date: Monday, November 29, 2021 9:15:38 PM

WARNING - This email originated from outside the State of Nevada. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Dr. Jon Pennell, DVM; Dr. Jeffrey Murawsky, MD; Dr. Trudy Larson, MD; Dr. Monica Ponce', DDS; Judith Bittner and Charles Smith,

I am contacting you today about any current or future consideration by the Nevada Board of Health to require that children receive COVID vaccines as a requirement for school enrollment and attendance in the state of Nevada. I strongly oppose any such measure and remind you that these vaccines are currently not approved for uptake in children ages 5-17 by the United States Food and Drug Administration (FDA). Per federal law as referenced below, any product licensed under an EUA requires that citizens and therefore in the case of minor children, their parents/legal guardians, have the option to accept or refuse the product.

Emergency Use Authorization of Medical Products and Related Authorities
Guidance for Industry and Other Stakeholders January 2017

<https://www.fda.gov/regulatory-information/search-fda-guidance-documents/emergency-use-authorization-medical-products-and-related-authorities>

Section E: Conditions of Authorization; 1. Information relating to the EUA Product; b. Information for Recipients: “the statute requires that FDA ensure that recipients are informed to the extent practicable given the applicable circumstances.....That they have the option to accept or refuse the EUA product”

I am currently homeschooling my children because Nevada's education department is a joke. I am also encouraging other parents to remove their children as well. If vaccines are enforced, TONS of parents will be taking their children out of the public school system.

Sincerely, Barb Mathers

WARNING - This email originated from outside the State of Nevada. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dr Jeffery Murawsky, MD, Dr Trudy Larson, MD, Dr Monica Ponce, DDS, Judith Bittner, & Charles Smith I wish to say this idea of vaccination that over rides parental care for their child(ren) is government overreach & will not be acceptable to the citizens of the State of NV. It goes against the Constitution & Bill of Rights in the United States of America. Nevada needs to stand with parents & children across this state that do not want mandated vaccination on an unreliable vaccine that does not have a good reliable outcome so far! Do not follow the footsteps of California. Marion Neto, to acknowledge this email recieved.

Date: Tuesday, November 30, 2021 5:53:46 PM

Dear Dr. Jon Pennell, DVM; Dr. Jeffrey Murawsky, MD; Dr. Trudy Larson, MD; Dr. Monica Ponce', DDS; Judith Bittner and Charles Smith,

I am contacting you today about any current or future consideration by the Nevada Board of Health to require that children receive COVID vaccines as a requirement for school enrollment and attendance in the state of Nevada.

I strongly object to any such measure and caution you all against willingly and knowingly proceeding forward with pushing COVID vaccines known to cause injuries and death upon children. In such occurrences of injuries or death you would be held liable with possible criminal charges levied.

The CDC shows that the survival rate for ages 0-17 for Covid19 is 99.998% (<https://www.cdc.gov/coronavirus/2019-ncov/hcp/planning-scenarios.html>). No one knows the long term effects of this experimental injection, however the CDC does warn that they can cause myocarditis and pericarditis.

There is not one case in the world of a child spreading Covid to an adult. There is simply no reason in the world to imperil our most precious children.

Regards,

Tom Lenz

You do not have the authorization to force peoples children to take an extremely harmful so called Covid vaccine of any kind because there are enormous risks, harms their development and there are numerous adverse effects including Encephalitis, convulsions and seizures, strokes, myocarditis (mRNA, multisystem inflammatory syndrome in children, enhanced disease, heart inflammation, and more.

Please, refrain from voting for this. You have no right and it is highly unconstitutional. You will enflame the citizenry / parents of this state. These are NOT your children. If they contract ANY illness or succumb due to the vaccine you shall have blood on your hands.

Subject: Vaccine Mandates
Date: Tuesday, November 30, 2021 11:16:19 AM

Dear Dr. Jon Pennell, DVM; Dr. Jeffrey Murawsky, MD; Dr. Trudy Larson, MD; Dr. Monica Ponce', DDS; Judith Bittner and Charles Smith,

I am contacting you today about any current or future consideration by the Nevada Board of Health to require that children receive COVID vaccines as a requirement for school enrollment and attendance in the state of Nevada.

GIVEN THE CURRENT SCIENCE WHICH HAS FOUND THAT THE VACCINES NEITHER PREVENT INFECTION NOR TRANSMISSION - THERE IS NO LONGER A BASIS FOR A VACCINE MANDATE.

There is no longer any justification to subject children to possible long term and currently unknown side effects from a virus they are unlikely to contract and even less likely to die from. Those at risk should consult with their doctor to determine if the vaccine is appropriate for them on a case by case basis.

I strongly oppose any such measure and remind you that these vaccines are currently not approved for uptake in children ages 5-17 by the United States Food and Drug Administration (FDA); rather they have been authorized by the FDA under an Emergency Use Authorization (EUA). Dr. Jon Pennell, DVM; Dr. Jeffrey Murawsky, MD; Dr. Trudy Larson, MD; Dr. Monica Ponce', DDS; Judith Bittner and Charles Smith:

I am contacting you today about any current or future consideration by the Nevada Board of Health to require that children receive COVID vaccines as a requirement for school enrollment and attendance in the state of Nevada. I strongly oppose any such measure and remind you that these vaccines are currently not approved for uptake in children ages 5-17 by the United States Food and Drug Administration (FDA); rather they have been authorized by the FDA under an Emergency Use Authorization (EUA). Per federal law as referenced below, any product licensed under an EUA requires that citizens and therefore in the case of minor children, their parents/legal guardians, have the option to accept or refuse the product. Emergency Use Authorization of Medical Products and Related Authorities Guidance for Industry and Other Stakeholders January 2017<https://www.fda.gov/regulatory-information/search-fda-guidance-documents/emergency-use-authorization-medical-products-and-related-authorities>Section E: Conditions of Authorization; 1. Information relating to the EUA Product; b. Information for Recipients: “the statute requires that FDA ensure that recipients are informed to the extent practicable given the applicable circumstances.....That they have the option to accept or refuse the EUA product.

Thank you for your service to the people of the State of Nevada. You have a sometimes thankless but incredibly important job as part of the Board. Your consideration of the science that’s out there and integration of some common sense into future decisions about this vaccination program is appreciated.

Regards,

Elmer Bull

NOTICE OF MALADMINISTRATION TO NEVADA BOARD OF HEALTH MEETING 12/03/2021 9:00 AM: Notice to Agent is Notice to Principal and Notice to Principal is Notice to Agent

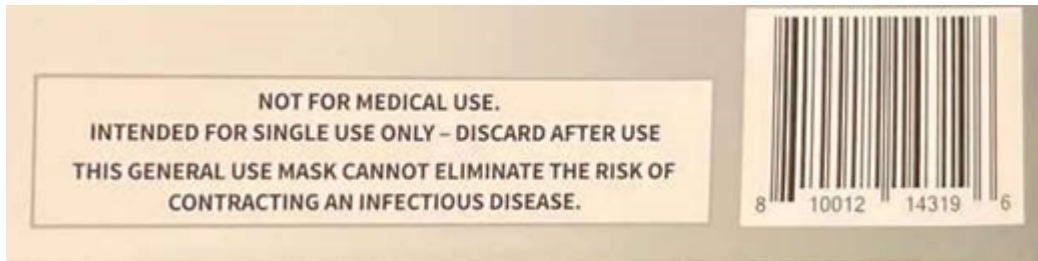

I, printedName, one of the People as seen in the Declaration of Rights of the Nevada state Constitution, am giving you this notice so that you and your agents may provide due care as I am an aggrieved taxpayer; I'll be watching via <https://dph.nv.gov/Boards/BOH/Meetings/2021/NVBOH2021/>
The liberty interest of a parent in the care, custody and management of the parent's child is a fundamental right. (See NRS 126.036 and Nevada Constitution Article 1 Section 1 stated below)

PLEASE TAKE NOTICE OF NEVADA CONSTITUTION DECLARATION OF RIGHTS ARTICLE 1:
Sec. 1: "Inalienable rights. All men are by Nature free and equal and have certain inalienable rights among which are those of enjoying and defending life and liberty; Acquiring, Possessing and Protecting property and pursuing and obtaining safety and happiness[.]"

Sec: 10: "The people shall have the right freely to assemble together to consult for the common good, to instruct their representatives and to petition the Legislature for redress of Grievances." (Emphasis added)

Sec: 17: "Neither Slavery nor involuntary servitude unless for the punishment of crimes shall ever be tolerated in this State." **FORCING CHILDREN TO WEAR MASKS IS INVOLUNTARY SERVITUDE!**
Requiring our children to wear MASKS that are not even intended for a medical use and cannot eliminate the risk of an infectious disease, is **EVIDENCE OF CHILD ABUSE AND MALADMINISTRATION!**

Sec. 8A. Rights of victims. 1. Each person who is the victim of a crime is entitled to the following rights:

(a) To be treated with fairness and respect for his or her privacy and dignity, and to be free from intimidation, harassment and abuse, throughout the criminal or juvenile justice process. **OUR CHILDREN ARE VICTIMS!**

(b) To be reasonably protected from the defendant and persons acting on behalf of the defendant.

2. **A victim has standing to assert the rights enumerated in this section in any court** with jurisdiction over the case. . . . and 4. A person may maintain an action to compel a public officer or employee to carry out any duty required by this section or any statute enacted by the Legislature pursuant thereto.

Dear Dr. Jon Pennell, DVM; Dr. Jeffrey Murawsky, MD; Dr. Trudy Larson, MD; Dr. Monica Ponce', DDS; Judith Bittner and Charles Smith,

I am contacting you today about any current or future consideration by the Nevada Board of Health to require that children receive COVID vaccines as a requirement for school enrollment and attendance in the state of Nevada. I strongly oppose any such measure and remind you that these vaccines are currently not approved for uptake in children ages 5-17 by the United States Food and Drug Administration (FDA); rather they have been authorized by the FDA under an Emergency Use Authorization (EUA).

Per federal law as referenced below, any product licensed under an EUA requires that citizens and therefore in the case of minor children, their parents/legal guardians, have the option to accept or refuse the product. WARNING - This email originated from outside the State of Nevada. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Dr. Jon Pennell, DVM; Dr. Jeffrey Murawsky, MD; Dr. Trudy Larson, MD;
Dr. Monica Ponce', DDS; Judith Bittner and Charles Smith,

I'm reaching out to you with regards to ANY future COVID "vaccine mandates" the Nevada Board of Health might raise for discussion for any children ages 5-17 and currently enrolled in public school. I strongly oppose any such measure. These so-called 'vaccines' are currently not approved for children ages 5-17 by the US FDA; rather they've been approved by FDA under an Emergency Use Authorization (EUA) ONLY. The long term adverse affects CANNOT possibly be studied or even realized at this early stage of implementation. Healthy children have practically ZERO chance of severe affects from COVID much less risk of death - to require ALL children to receive this 'vaccine' is absolutely irresponsible.

Per federal law as referenced below, any product licensed under an EUA requires that citizens and therefore in the case of minor children, their parents/legal guardians, have the option to accept or refuse the product.

I do believe you understand the legal boundaries placed upon such emergency use. I'm sure the Board has fully researched the implications of a so-called "mandate" and it's tyrannical oppression upon the citizens of NV and their minor children. As is commonly said everyday now, these health decisions should only be between a person and their doctor.

Finally, it's been proven the 'vaccine' does not stop transmission: you can still 'get it' and 'give it.' At the very least the shots are a treatment to lessen symptoms - and the majority of children in this age group have very mild cases.

A Nevada Citizen of Reno,

Lynda Frieden

Dear Dr. Jon Pennell, DVM; Dr. Jeffrey Murawsky, MD; Dr. Trudy Larson, MD; Dr. Monica Ponce', DDS; Judith Bittner and Charles Smith,

I am contacting you today regarding any current or future consideration by the Nevada Board of Health to require that children receive COVID vaccines as a requirement for school enrollment and attendance in the state of Nevada. I strongly oppose any such measure and remind you that these vaccines are currently not approved for uptake in children ages 5-15 by the United States Food and Drug Administration (FDA); rather they have been authorized by the FDA under an Emergency Use Authorization (EUA). Per federal law as referenced below, any product licensed under an EUA requires that citizens and therefore in the case of minor children, their parents/legal guardians, have the option to accept or refuse the product.

Further, the Pfizer FDA approved vaccine for persons 16 and older ONLY applies to the vaccine licensed as "Comirnaty" which is NOT currently available in the United States. ALL vaccines given to school age children and adults are NOT FDA APPROVED. They are only under emergency use. I urge you to take caution when attempting to mandate an EUA product.

Dear Dr. Jon Pennell, DVM; Dr. Jeffrey Murawsky, MD; Dr. Trudy Larson, MD; Dr. Monica Ponce', DDS; Judith Bittner and Charles Smith,

I am contacting you today about any current or future consideration by the Nevada Board of Health to require that children receive COVID vaccines as a requirement for school enrollment and attendance in the state of Nevada. I strongly oppose any such measure and remind you that these vaccines are currently not approved for uptake in children ages 5-17 by the United States Food and Drug Administration (FDA); rather they have been authorized by the FDA under an Emergency Use Authorization (EUA). Per federal law as referenced below, any product licensed under an EUA requires that citizens and therefore in the case of minor children, their parents/legal guardians, have the option to accept or refuse the product.

Emergency Use Authorization of Medical Products and Related Authorities Guidance for Industry and Other Stakeholders January 2017

<https://www.fda.gov/.../emergency-use-authorization...>

Section E: Conditions of Authorization; 1. Information relating to the EUA Product; b. Information for Recipients: “the statute requires that FDA ensure that recipients are informed to the extent practicable given the applicable circumstances.....That they have the option to accept or refuse the EUA product”

In addition, the FDA approval was specifically for Pfizer-BioNTech’s Comirnaty, which is currently not available, and not for the current Pfizer vaccines.

Furthermore, it is unethical to require any experimental medical treatment with unknown long term side effects and concerning short term adverse reactions on any demographic, but especially on demographics which are at low risk, such as children and young adults, both of whom are at very low risk for serious cases of Covid-19. Vaccine mandates are historically also meant to halt the spread of infectious viruses. Since the current Covid-19 vaccines do not prevent infection or spread of the virus (as admitted by sources ranging from independent researchers to officials in the pro-vaccine Centers for Disease Control), and data from heavily vaccinated countries and states suggest the possibility that high vaccination rates with a non-sterilizing vaccine actually could lead to the spread of variants resistant against Covid-19 Spike-directed antibodies, any sort of vaccine mandate using the current Covid-19 mRNA or adenovirus vaccines will fail to halt the spread of current and future variants. In fact, a large percentage of the population being inoculated with may possibly be more susceptible or sensitized to future waves of infection than a non-vaccinated population with durable acquired immunity in much of the population

Let us not rush into mandating any experimental medical treatments. Instead, let us respect freedom of choice and acknowledge that not all individuals and demographics have the same

health needs. Every individual has their own history of infection, injury, allergies, diet, exercise, inherited conditions, and so on. What is best for one demographic or individual may not be what is best for another. Finally, let us do no harm and trust individuals to make personal, informed decisions as to what is best for their health.

Regards,

V.M., NV resident

Ladies and Gentlemen:

You must heed the following;

- 1- Declare an end to the " Public Health Emergency"**
- 2- Prohibit mandatory Covid-19 vaccines. (children)**
- 3- Ban Covid-19 vaccine passports/ verification.**
- 4- Ban Mask Mandates**
- 5- Promote good health and "early" therapeutic treatments**
- 6- Acknowledge Covid-19 is now endemic, NOT a pandemic**

Respectfully,

B. Foster
Sparks

As Rick Green clearly states:

By my count, that's 3 for 3 victories in the last 2 weeks against the unconstitutional, unscientific, illogical, abusive, purge-oriented mandates of the Bidentatorship. 1st, the private business mandate was blocked; 2nd, the healthcare worker mandate was blocked; and now the federal contractor mandate was blocked. In all cases, the courts actually invoked the Constitutional lines of authority (imagine that) and said it was an overreach. Next up... military purge and federal employees. <https://www.theepochtimes.com/judge-blocks-bidens-covid-19-vaccine-mandate-for-federal-employees....>

Let's follow Governor Ron De Santis's example in the FREE State of Florida.....

The most important agenda item is making red states "red" again and strong enough to interpose between us and the federal government. We are joined by Florida Governor Ron DeSantis to discuss his plan to stand between federal tyranny and the liberties of the people. DeSantis discusses his ideas for fighting COVID fascism and illegal immigration when the federal government has abrogated its duty. He also discusses the need to allow doctors to treat the virus.

Dear Members of the Nevada Board of Health: Dr. Jon Pennell, DVM; Dr. Jeffrey Murawsky, MD; Dr. Trudy Larson, MD; Dr. Monica Ponce', DDS; Judith Bittner and Charles Smith:

We are contacting you today about any current or future consideration by the Nevada Board of Health to mandate or to require that children receive COVID vaccines as a requirement for school enrollment and attendance in the state of Nevada. We would like to remind you that not one of the vaccines currently on the market are approved for uptake in children ages 5-17 by the United States Food and Drug Administration (FDA); rather they have been authorized by the FDA under an Emergency Use Authorization (EUA). Per federal law as referenced below, any product licensed under an EUA requires that citizens; and therefore parents/legal guardians, in the case of minor children, have the option to accept or refuse the product.

Emergency Use Authorization of Medical Products and Related Authorities Guidance for Industry and Other Stakeholders January 2017

<https://www.fda.gov/regulatory-information/search-fda-guidance-documents/emergency-use-authorization-medical-products-and-related-authorities>

Section E: Conditions of Authorization; 1. Information relating to the EUA Product; b. Information for Recipients:

"the statute requires that FDA ensure that recipients are informed to the extent practicable given the applicable circumstances.....That they have the option to accept or refuse the EUA product"

If the Nevada State Board of Health takes any step(s) towards a Covid "vaccine" mandate or the requirement of such for school registration and attendance for K-12 schoolchildren (ages 5-17), Health Freedom Nevada and America's Frontline Doctors along with additional entities and stakeholders will pursue legal action against the State of Nevada, the Nevada Department of Health and Human Services, the Nevada Board of Health and each member of this board personally for willful negligence and for reckless endangerment of the approximately 492,338* school-aged children in Nevada.
