WARNING - This email originated from outside the State of Nevada. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Just a FYI

[Open in app or online](#)

Today's livestream at the Senate

For those interested in watching

ROBERT W MALONE MD, MS
DEC 7

SAVE

LISTEN

I am on my phone, and getting ready to start. But I wanted anybody who wanted to watch the live stream to be able to. [So here is the link and the draft agenda.](#)

Why are we here

1. Vaers– Liz Willner
2. V SAFE– Aaron Siri
3. Insurance data, disability data– Ed Dowd
4. CDC and international data– Josh Stirling
5. Anecdotal evidence of data– Kirk Milhoan, Renata Moon, James Thorp
6. Personal stories– Joel Wallskog, Bri Dressen

Coronavirus—Dr. Cole, Dr. Risch

1. Description of virus, why it's unique and deadly, how it infects, etc.-- Dr. Cole
2. Virus Epidemiology, age stratified risk, how we overreacted-- Dr. Risch

VIDEO– Del Bigtree

Vaccine

1. History of mRNA development - Dr. Malone
2. Vaccine composition/toxicology- Dr. Janci Lindsay / Dr. Malone
3. How the vaccine actually works? – Dr. McCullough, Dr. Wiseman, Dr. Malone, others?
4. Vaccine Manufacturing and Regulatory standards - David Gortler

VIDEO– Del Bigtree

1. Tests that should have been performed, but weren't – Peter McCullough, David Wiseman, David Gortler

Different mechanisms that could produce vaccine injury

1. Myocarditis- Kirk Milhoan
2. Sudden cardiac death- Peter McCullough
3. Clotting- Ryan Cole
4. Neurological issues – Theresa Long, Joel Wallskog
5. Fetal Demise- James Thorp
6. Cancers- David Wiseman

Other Issues to Discuss

1. What we were told that wasn't true:
 - Said it would stay in arm
 - Bio persistence
 - Vaccinated people don't get COVID
 - Vaccine is safe and effective
2. Other vaccines that have been pulled/ adverse effects– Janci Lindsay
3. What have we learned from the Pfizer trial documents
4. Lot to lot variation- David Gortler
5. What studies/data does CDC/FDA/NIH cite to claim vaccine efficacy, reduction of severity of symptoms and death. – Peter McCullough
6. Vaccine mandates
7. Intimidation of doctors and nurses
8. Risk/Benefit
9. Could mass vaccination be driving all the variants - Paul Alexander
10. Censorship
11. Future plans for mRNA vaccines

WSJ's Finley: "Are Vaccines Fueling New Covid Variants? The virus appears to be evolving in ways that evade immunity."; Duh! Yes, Yes, it's the VACCINE, stupid! I, GVB, others, have been saying this 2

years, to STOP the fraud ineffective, sub-optimal mRNA-DNA gene injection! Yes, mutations enable it to evade antibodies from prior infection & vaccines, because it's selecting for infectious variants

[DR. PAUL ALEXANDER](#)

JAN 3

'It isn't clear that XBB is any more lethal than other variants, but its mutations enable it to evade antibodies from prior infection and vaccines as well as existing monoclonal antibody treatments. Growing evidence also suggests

that repeated vaccinations may make people more susceptible to XBB and could be fueling the virus's rapid evolution.'

Duh? Is the CDC, NIH, FDA, NIAID and these idiots so very idiotic? Bourla and Bancel? Or do they know the fraud they are pulling and assume we are that stupid. Which is it? For folk like me have been telling them all along the bogus junk illogical WRONG actions they are taken, led by GVB's brilliance. None of this is new to us! Go back and read what we have been saying!

Alexander COVID News-Dr. Paul Elias Alexander's Newsletter is a reader-supported publication. To receive new posts and support my work, consider becoming a free or paid subscriber.

Yes, we have written, I have written, we have said that strong research by Fantini et al. and Liu et al. indicates that the COVID gene injection is giving the virus infectious properties it did not prior have and causing the vaccinee to become infected, get ill, and many die! We have been saying this near 2 years now because we understood the role of mounting sub-optimal immune pressure, in concert with massive infectious pressure, when using a non-sterilizing, non-neutralizing (mismatched) vaccine as the COVID vaccine. We knew that selection pressure will select for more infectious variants and that the pandemic will not end. We knew the end would be infectious variant after infectious variant.

The Wellness Company

Case in point, just quickly glance over this prior substack by me, look at the language and warning:

Alexander COVID News-Dr. Paul Elias Alexander's Newsletter

'XBB.1.5' is the new United States grand-daddy sub-variant now displacing BQ.1.1 & BQ.1 & BA.5; XBB.1.5 based on CDC data today accounts for 40.5% proportion; Vanden Bossche, Hodkinson, I, we warned

The pace at which XBB.1.5 is (has) supplanting (supplanted) BA.5 and BQ.1.1 etc. is staggering. Moreover, indications are that it is the vaccine that is driving the variants (Fantini et al., Liu et al.), not the virus. Yes, viruses mutate readily and spontaneously (due to the unstable genetic copying mechanism etc.) yet it is the added pressure by the v...

Dear Readers,

I also embed this short piece on The Wellness Company and The UNITY Project.

First, The Wellness Company (found at www.TWC.health).

I am proud to announce a unique partnership with The Wellness Company and everyone who believes in medical freedom. My dear and esteemed colleagues Dr. Peter McCullough and Dr. Harvey Risch are also in partnership with The Wellness Company which provides telemedicine services for long-haul COVID, vaccine injury, and medical exemptions along with supplements and products that are fully aligned with our values. This support for The Wellness Company stems from the sub-optimal medical care and response that we experienced throughout the pandemic. It became apparent that there are many glaring gaps in our healthcare system and people were not properly treated. Thus, the pivot by us to support The Wellness Company. Take a stand against a broken healthcare delivery system with a membership in The Wellness Company, which directly funds our fight against medical tyranny. Click here [The Wellness Company](#) for more information.

I also provide scientific support to The [UNITY Project](#) out of California. A magical organization for good. I support this tremendous initiative with some fine colleagues who have been warriors in the fight against all the wrongs in COVID. The [UNITY Project](#) aligns with my core values for it is very fierce in its fight to protect children from the danger of the largely safety untested COVID gene injection ([The Unity Project Formed by Concerned Parents to Coordinate Opposition to California's K-12 COVID-19 Vaccination Mandate](#)) (contact: info@theunityproject.org).

We pray.

Dr. Oskoui suggested to be open to all possibilities here such that a damaged heart due to the vaccine could not withstand the hit it ordinarily could have. The hit causes a surge in adrenalin etc. that greatly stresses the heart muscle. With damaged myocardium and disturbed electrical signals, the heart can go into cardiac arrest.

In short, myocarditis is often silent (due to infection or COVID vaccine induced), and many who die suddenly die due to heart failure. The heart often

during exercise can stop with the dopamine, norepinephrine surges.

We need more information, but there is a possibility that the heart myocardium due to vaccine he took is so very damaged that the hit deranged the electrical impulses in an already damaged heart and it stopped; yes, it can happen if you take a huge hit to the chest (even with padded protection and often to the left side of the chest just over the heart) and it is compounded by an already damaged heart. Yes, a blow to the chest can cause a dangerous heart rhythm and if the myocardium is already damaged e.g. due to myocarditis that was silent and undiagnosed and he exerted himself, one could suddenly die. The surge in dopamine and adrenaline chemicals can place stress on the heart but the heart muscle is damaged and not working as it should. An exercise bout and we argue, given the surge in catecholamines as you begin to wake after sleep, can cause sudden death. This is why we say so many deaths happen 'in your sleep' now post COVID gene injection.

God will smile on him if he survives and I pray. We pray. This tells you something now in your face, this vaccine was a death shot.

<https://medicalxpress.com/news/2014-12-chest-trigger-potentially-dangerous-heart.html>

‘Commotio cordis (Latin, "agitation of the heart") is an often lethal disruption of heart rhythm that occurs as a result of a blow to the area directly over the heart (the precordial region) at a critical time during the cycle of a heart beat, producing what is termed an R-on-T phenomenon that leads to the condition. It is a form of ventricular fibrillation (V-Fib), not mechanical damage to the heart muscle or surrounding organs, and not the result of heart disease. The survival rate is 58%, which is an increase in comparison to years 1993–2012, where only 34% victims survived. This increase is likely caused by the prompt CPR, access to defibrillation and higher public awareness of this condition. [1]

Commotio cordis occurs mostly in boys and young men (average age 15), usually during sports, most frequently baseball, often despite a chest protector. It is usually caused by a projectile, but can also be caused by the blow of an elbow or other body part. Being less developed, the thorax of an adolescent is likely more prone to this injury given the circumstances.'

Fauci, Birx, Francis Collins, Azar, Bourla, Bancel, Jha, Howard Njoo, Theresa Tam, Walensky, Doug Ford, Williams, Kieran, Marks, de Villa, Jüni, Bogoch et al. with CDC, NIH, FDA officials, **HANG** high!

If proper legal inquiries, proper tribunals, proper inquiries with judges investigate & declare your COVID lockdown lunacy actions caused deaths, I say take every penny & hang you HIGH! No amnesty!

DR. PAUL ALEXANDER
DEC 27

SAVE

LISTEN

You beasts, you illogical, irrational, absurd, inept and incompetent malfeasant untermensche, you beelzebubs, you bottom-dweller public health officials, you worst than devil putrid vapid filths, with the complicit equally filthy legacy media, for the lives you took with your lockdowns and school closures, the mandates, the lunacy, the denial of early effective treatment, the lies about inferiority of natural immunity relative to vaccinal immunity and the forcing of the fraud failed ineffective and deadly COVID gene injections that have so

many of our police and military and border agents vaccine injured with many going to, not 'if' but going to die in time due to your mandates, I want each and everyone of you shown to have caused deaths, to hang!

We gave you the data day one, I ensured you got it while at HHS, you Hahn, all of you, me, Berenson, Kulldorff, McCullough, Risch, Ladapo, Tenenbaum, Bhattacharya, Gupta, Atlas et al. We printed the data, spoke out, gave it to you, went on media, but you pretended, you covered up, you worked to cancel and smear us with TWITTER, FACEBOOK, YouTube etc. You filthy animals. But you cannot hide. We will never stop until you are in a proper legal inquiry to answer for your COVID lunatic policy decisions that killed people. Each one of you I named have blood on your hands of Americans, Canadians, British people, all peoples. Your decisions killed people, killed our elderly, killed our children, many committed suicide on accounts of your lunacy. So you must pay! You must be held accountable and yes, you must be allowed in proper inquiries, legal, to defend yourselves.

But if shown conclusively in court, and a judge declares such, that your actions caused deaths of innocent otherwise healthy people and children, then I want them to hang you!

Dear Readers,

I also embed this short piece on The Wellness Company and The UNITY Project.

First, The Wellness Company (found at www.TWC.health).

I am proud to announce a unique partnership with The Wellness Company and everyone who believes in medical freedom. My dear and esteemed colleagues Dr. Peter McCullough and Dr. Harvey Risch are also in partnership with The Wellness Company which provides telemedicine services for long-haul COVID, vaccine injury, and medical exemptions along with supplements and products that are fully aligned with our values. This support for The Wellness Company stems from the sub-optimal medical care and response that we experienced throughout the pandemic. It became apparent that there are many glaring gaps in our healthcare system and people were not properly treated. Thus, the pivot by us to support The Wellness Company. Take a stand against a broken healthcare delivery system with a membership in The Wellness Company, which directly funds our fight against medical tyranny. Click here [The Wellness Company](#) for more information.

I also provide scientific support to The [UNITY](#) Project out of California. A magical organization for good. I support this tremendous initiative with some fine colleagues who have been warriors in the fight against all the wrongs in COVID. The [UNITY](#) Project aligns

with my core values for it is very fierce in its fight to protect children from the danger of the largely safety untested COVID gene injection ([The Unity Project Formed by Concerned Parents to Coordinate Opposition to California's K-12 COVID-19 Vaccination Mandate](#)) (contact: info@theunityproject.org).

STATE BOARD OF HEALTH
DIVISION OF PUBLIC AND BEHAVIORAL HEALTH

Administration of Mental Health and Intellectual and Developmental Disability Programs

LCB File No. R091-22

Proposed Amendments to Chapter 433 of Nevada Administrative Code

Comments of Charter Communications, Inc.

Through its local subsidiaries and affiliate companies, Charter Communications, Inc. (“Charter”) is a provider of communications services in the State of Nevada, providing cable television service, broadband internet access service, and both landline and mobile telephone services to thousands of Nevadans. As a service provider, Charter has an interest in helping ensure that the state’s new 988 system functions effectively with the financial support intended. From that perspective, Charter suggests the following revisions to the Board’s proposed amendments to Chapter 433 of the Nevada Administrative Code pertaining to the surcharge to support the 988 system. (Charter’s proposed revisions are included here, in redline form, as Exhibit A.)

First, the rule should be revised so that its scope, consistent with that of the underlying statute’s, encompasses Voice over Internet Protocol (VoIP) service and mobile telephone service, in addition to traditional landline telephone service. Traditional telephone service is classified as a “telecommunication service.”¹ Telecommunication service and “telecommunication providers” are subject to the jurisdiction of the Nevada Public Service Commission (NPSC).² More recently, new forms of voice telephony have become popular, especially mobile (cellular) telephone service and VoIP service. For regulatory purposes, these services are not considered “telecommunication service,” and they remain outside the scope of NPSC regulation.³ It is clear, however, that the Nevada legislature intends for the 988 statute to extend to these voice services capable of calling 988.

¹ NRS § 704.025 (defining “telecommunication”); NRS § 704.027 (defining “telecommunications provider” and “telephone company”); NRS § 704.028 (defining “telecommunication service” and “telephone service”). Note, at the federal level, the term is “telecommunications service.”

² NRS § 704.021 (provider of telecommunication service is a “public utility”); NRS 703.150 (NPSC has jurisdiction over public utilities).

³ NRS 704.020(1)(b) (excluding providers of commercial mobile radio service from definition of public utility); NRS 704.685 (removing VoIP service from regulation by state agencies (including NPSC)).

As currently drafted, it is not clear that the proposed rule accomplishes the legislative intent, and we urge that the rule be revised to clearly do so. First, we propose revised definitions for the terms “access line” and “trunk line.” The proposed definitions for these terms rely on citations to Nevada statutory provisions that do not actually define the terms and do not provide workable definitions of either term. Further, because the statutory provisions referenced do not apply to VoIP or mobile voice providers, it is unclear how these definitions would apply to the providers of those services. We suggest that the Board define these key definitions for purposes of this 988 surcharge rule, potentially without reference to the Nevada statutory provisions that seem ill-suited to accomplishing the Nevada Legislature’s objectives here.

Second, we suggest that “commercial mobile communication services” be equated to “commercial mobile radio service,” which is the defined term used in the Federal Communications Commission’s (FCC) rule that is already incorporated by reference. Similarly, we suggest that “IP-enabled voice service” be defined by reference to the federal statutory provision that defines the term in the context of authorizing state 988 surcharges. The Nevada rule that is currently referenced provides a definition for VoIP that is specifically interconnected VoIP, and not a definition of IP-enabled voice service that encompasses both interconnected VoIP and one-way VoIP. Both of these recommended federal definitions are well-established in the communications industry, and incorporating them here by reference should add a degree of stability to the rule.

Third, in Section 4 we make two suggestions to clarify the rules for assessing and collecting the new 988 surcharge. In paragraph (a), we suggest that the rule clearly state that the obligation to bill and remit the 988 surcharge on applicable services applies to telecommunication providers, commercial mobile communication services providers, and IP-enabled voice service providers, as required by the 988 statute. In paragraph (b) we suggest that the number of access lines or trunk lines attributed to a given customer be deemed to equal the number of 988 calls the customer can make at the same time. This clarification should eliminate uncertainty, and be consistent with the approach used for 988 surcharges and other surcharges (such as 911) in other jurisdictions.⁴

Lastly, in Section 5, we propose a revision that will clarify that *all* contributing communications service providers shall report to the Board of Health as required, as opposed to only the regulated telecommunication providers as defined in Section 2.1 of the proposed rules.⁵ Again, this aligns with the statutory intent that the obligation to support the 988 system be imposed on consumers of communications services that *include* regulated telecommunication services but are *not limited to* regulated telecommunication services.

⁴ See, e.g., Colo. Stats. § 40-17.5-101 (number of state 988 surcharges equal to number of simultaneous calls possible); Wash. Stats. § 82.86.020 (same); Tenn. Stats. 7-86-128 (number of state 911 surcharges for complex/multichannel voice service to fixed locations equals the number of simultaneous outbound calls to 911 that can be placed using the service); N.M. Stats. § 63-9D-5 (number of state 911 surcharges on VoIP service equal to number of simultaneous VoIP calls possible).

⁵ The temporary rules still reference Section 1.1 of the rules which based on section renumbering between rule drafts, does not now exist.

Charter supports the development of the 988 system at both the federal and state levels. Our experience with 911 and other public services that rely on private communications networks gives us insight into issues that can arise when implementing and funding such a system. We look forward to continuing to work with the State of Nevada to ensure that the new 988 system is implemented and funded effectively for the benefit of all Nevadans.

Respectfully submitted January 6, 2023.

/s/ Torry Somers
Torry Somers
Vice President – State Regulatory
Charter Communications, Inc.

EXHIBIT A

PROPOSED TEMPORARY REGULATION OF THE STATE BOARD OF HEALTH
Amendments to the Nevada Administrative Code (NAC) Chapter 433
Relating to the 988 National Suicide Prevention Lifeline

Explanation – Language in *blue italics* is new.

AUTHORITY: NRS 433.708, NRS 439.150

Section 1. Chapter 433 of the NAC is hereby amended by adding thereto the provisions set forth as sections 1 to 6, inclusive, of this regulation.

Section 2. Definitions.

1. *“Telecommunication provider” or “telephone company” defined.*

“Telecommunication provider” or “telephone company” has the same meaning as ascribed to it in NRS 704.027.

2. *“Telecommunication service” defined. “Telecommunication service” has the same meaning as ascribed to it in NRS 704.028.*

3. *“Access line” defined. ~~“Access line” has the same meaning as ascribed to it in NRS 704.006(2)~~ means any connection provided by a telecommunication provider, a commercial mobile communication services provider and/or a IP-enabled voice services provider that allows a customer to call 9-8-8.*

4. *“Trunk line” defined. ~~“Trunk line” has the same meaning as ascribed to it in NRS 704.008~~ means a transmission path, or group of transmission paths, connecting a customer’s Private Branch Exchange, an automatic call distributing system, or other similar device, to a service provider’s public switched network.*

5. *“Commercial mobile communication services” defined. ~~“Commercial mobile communication services” means an interconnected voice calling service available to the public, or to such classes of eligible users as to be effectively available to a substantial portion of the public as defined at~~ has the same meaning as “commercial mobile radio service” as provided in 47 CFR § 20.3(a) and (b).*

6. *“Voice calling service” defined. “Voice calling service” means voice service capable of dialing the digits 9-8-8 to access the National Suicide Prevention Lifeline, provided to each customer of that service whose place of primary use is in Nevada. (a) “Place of primary use” means the street address representative of where the customer’s use of the ~~mobile telecommunications~~ service primarily occurs, as defined by 4 U.S. Code § 124(8) which must be: (1) The residential street address or the primary business street address of the customer; and (2) Within the licensed service area of the home service provider.*

Commented [Charter1]: This definition needs to be broad enough to reach the connections of VoIP and mobile wireless providers. The existing definition which references a statutory provision that does not apply to these providers does not clearly reach them.

Commented [Charter2]: Alternatively, if the definition is left as proposed by the Board of Health it will not apply to VoIP and wireless providers.

Commented [Charter3]: Adopts the FCC definition.

Commented [Charter4]: This provision seems unnecessary if the definition of “commercial mobile communication service” is changed to eliminate mention of “voice calling service.”

7. “IP-enabled voice service” defined. “IP-enabled voice service” has the same meaning as ascribed to it in 47 U.S.C. § 251a.

Commented [Charter5]: This terms is expressly defined in the federal statute and is not expressly defined in the Nevada statutes.

Section 3. *To sufficiently support the uses set forth in Section 5(2) of Senate Bill 390 (2021) and produce the revenue projected in the budget for the Division approved by the Legislature, a surcharge of 35 cents is imposed on the following, per month:*

1. Each access line providing telecommunication service furnished to a customer;
2. Each access line of each customer of a company that provides commercial mobile communication services;
3. Each access line providing IP-enabled voice services; and
4. Trunk lines.

Commented [Charter6]: Using a defined term instead of an undefined term.

Commented [Charter7]: The Nevada statute does not require limiting the surcharge to residential customers of telecommunication service, and doing so in this manner is not equitable. Either delete “residential” here or add it appropriately to #2 & #3.

Section 4. (a) Each telecommunication provider, commercial mobile communication services provider and/or IP-enabled voice services provider shall bill each of its customers for the surcharge as described in Section 3 and remit the money collected on a monthly basis to the Crisis Response Account within the Division of Public and Behavioral Health or its designated agent in accordance with Funds Transfer Instructions for Telecommunications Providers and subsequent sub regulatory guidance.

Commented [Charter8]: Stating the requirement more clearly.

(b) For purposes of this subsection, the number of access lines or trunk lines attributed to a customer shall be equal to the number of calls the customer can make to 9-8-8 at the same time.

Commented [Charter9]: Recommended provision that is consistent with 988 and 911 surcharges in other jurisdictions.

Section 5. Within 90 days of the effective date of this regulation, each telecommunication provider, commercial mobile communication services provider and/or IP-enabled voice services provider shall report to the Board of Health or its designated agent the average number of lines in service per month in each of the categories identified in Section 3 in the previous calendar year and annually each April 1st thereafter. This information shall be regarded as proprietary information regarding trade secret and subject to the provisions of NRS 333.333.

Commented [Charter10]: Without the broader provider references, only traditional wireline providers are required to provide this information.

Commented [Charter11]: Due to the change in Section references between rule drafts, it appears that if this reference is retained it should be to Section 2.1.

Section 6. *The surcharge described in Section 3 shall be imposed 90 days after this regulation becomes law.*

Good afternoon Ms. Rojas,

If you send the contact information for the individuals who would like to attend, I can add them to our listserv to receive updates on the Board of Health. You can also check scheduled meetings on the Board of Health website, and view meeting location information, agendas, additional materials, etc: [Meetings \(nv.gov\)](#)

There is not a formal calendar posted anywhere, but the Board of Health Meetings are scheduled as follows for 2023 at this time:

- January 20th, 2023 at 9am (virtual only- special meeting)
- March 3rd, 2023 at 9am
- June 2nd, 2023 at 9am
- September 1st, 2023 at 9am
- December 1st, 2023 at 9am

Thank you,

Autumn Blattman

Ladies and Gentlemen:

I implore you to do the right thing and cease any availability of the CV19 shot as it is all based on a lie\$. Washoe County Health District, in turn, must promote healthy living and have therapeutics as Ivermectin, Mono-clonal, as well as Hydroxychloroquine available.

US Government in Full Scale Implosion Because of Corruption – Catherine Austin Fitts

CAF says a big trend in 2023 that is already underway is people realizing the CV19 injections were not meant to save you but harm and kill you. CAF say the CV19 injections were a bioweapon meant for depopulation, and everybody in America will know this in 2023. CAF says, “The mainstream media has done a good job painting a different picture, but at some point, you cannot defy reality, and that is coming out. We have already seen it translate into market action. We see life insurance companies trading down 30% and the funeral home business trading up 20%. That is a 50% divergence.”

Inherited Risk of Sudden Death Triggered by COVID-19 Vaccination

SCN5A Channelopathy Variants Give Clues for Who May be Next

PETER A. MCCULLOUGH, MD, MPH™

JAN 11

By Peter A. McCullough, MD, MPH

I mentioned on Tucker Carlson last week in commentary on Buffalo Bills player Damar Hamlin that genetic conditions will be considered. There is an array of known sodium, potassium, and other ion channel mutations in the heart that pose a genetic proclivity to sudden death. In severe mutational cases, the channelopathy is the sole determinant. Many other circumstances, the baseline abnormality and then a superimposed insult to the heart. Two papers (Lim from Korea, Ittiwut from Thailand) now have found that SCN5A variants for cardiomyocyte channels by genetic assessment or by clinical determination on ECG (Brugada pattern) explain cases of sudden death after vaccination.

Lim KH, Park JS. COVID-19 Vaccination-Induced Ventricular Fibrillation in an Afebrile Patient With Brugada Syndrome. *J Korean Med Sci.* 2022 Oct 31;37(42):e306. doi: 10.3346/jkms.2022.37.e306. PMID: 36325610; PMCID: PMC9623033.

The Brugada pattern and sudden death is known to be triggered by fever, thus the reactogenic phase of vaccination with fever itself may explain the initiation of VT/VF and cardiac arrest.

Ittiwut C, Mahasirimongkol S, Srisont S, Ittiwut R, Chockjamsai M, Durongkadech P, Sawaengdee W, Khunphon A, Larpadisorn K, Wattanapokayakit S, Wetchaphanphesat S, Arunotong S, Srimahachota S, Pittayawonganon C, Thammawijaya P, Sutdan D, Doungngern P, Khongphatthanayothin A, Kerr SJ, Shotelersuk V. Genetic basis of sudden death after COVID-19 vaccination in Thailand. *Heart Rhythm*. 2022 Aug 5;19(11):1874–9. doi: 10.1016/j.hrthm.2022.07.019. Epub ahead of print. PMID: 35934244; PMCID: PMC9352648.

I am disappointed that world class electrophysiology research departments at US medical schools are being outclassed by investigators in Asia. COVID-19 vaccine induced myocarditis and sudden death should be a top research priority for every cardiology division in the country at this time.

These papers raise the concept that not all patients after the injection or those with manifest COVID-19 vaccine-induced myocarditis are at risk for

sudden death. In my clinical practice I incorporate genetic testing for channelopathies to fine tune the prognosis for patients. Let's hope Damar Hamlin gets high quality of care and critical thinking by electrophysiologists who understand the COVID-19 vaccine induced myocarditis can be fatal in the setting of a channelopathy such as SCN5A and probably many others.
