Re: Kidney Disease Advisory Committee – Seeking New Members

Per NRS 439.261, the Division of Public and Behavioral Health was authorized to apply for grants from the Federal Government and other sources to support the identification, understanding, and mitigation of health disparities in kidney disease that are based on race. Such disparities include, but are not limited to, issues related to the early detection, frequency, and severity of kidney disease, as well as the promotion of kidney transplantation.

In furtherance of this initiative, the Division may establish and consult with an advisory committee to develop a sustainable plan designed to increase education and awareness of kidney disease and, to the extent permitted by grant terms, to facilitate the delivery of services supported by these funds. The advisory committee shall be composed of representatives from the following:

- Patients with Kidney Disease.
- Organ Procurement Organization.
- National Kidney Organizations.
- Any Other Members that the Division deems appropriate.

The Division is now seeking new members for this advisory committee. If you have interest or expertise in kidney disease care and prevention, patient advocacy, or represent a medical facility, organ procurement organization, or national kidney organization, you may be well suited to contribute to this important work in addressing health disparities in kidney disease.

If you are interested in being considered for appointment, please submit a letter of interest along with your current resume by March 31, 2025. Additional Information

Agency Name: Office of the Assistant Secretary for Health

Description: The Office of Minority Health announces the anticipated availability of funds for Fiscal Year (FY) 2025 under the authority of 42 U.S.C. § 300u-6 (Section 1707 of the Public Health Service Act) for demonstration projects that support adaptations of evidence-based/informed approaches to reduce disparities in chronic kidney disease (CKD) and related risk factors. Demonstration projects are time-limited projects for the purpose of assessing the effectiveness of an approach or intervention toward reaching a desired outcome. We expect award recipients under this opportunity to consider approaches to sustainability beyond the end of the support provided by OMH. Groups disproportionately affected by CKD may face barriers to health care and social services that increase their risk of poor health outcomes. We intend for funded projects to demonstrate that innovative community-based strategies can address social determinants of health (SDOH) and reduce health disparities in chronic kidney disease and related risk factors. OMH also expects projects to implement novel approaches that demonstrate progress toward CKD related Healthy People 2030 objectives. See <https://health.gov/healthypeople/objectives-and-data/browse-objectives/chronic-kidney-disease> for more information. Eligible applicants include any private nonprofit or public entity located in a State. “State” includes, in addition to the several States, only the District of Columbia, Guam, the Commonwealth of Puerto Rico, the Northern Mariana Islands, the Virgin Islands, American Samoa, the Trust Territory of the Pacific Islands, and any agency or instrumentality thereof exclusive of local governments. (42 U.S.C. § 201(f) (PHS Act, Section 2(f)), 45 C.F.R. § 75.2). Eligible entities include private nonprofit or public faith-based organizations, community-based organizations, and American Indian/Alaska Native/Native American (AI/AN/NA) organizations. Applications must be submitted through Grants.gov, and applicants must have an active SAM.gov registration when submitting an application. Interested applicants are strongly encouraged begin the registration process for both systems early. We typically fund awards in 12-month budget periods. We may approve shorter budget periods or periods of performance to accommodate administrative factors or funding constraints. For multi-year projects, recipients must submit a non-competing continuation (NCC) application for each budget period after the first. Continuation funding is contingent upon the availability of funds, satisfactory progress of the project, appropriate stewardship of federal funds, and the best interests of the government. Funding for all approved budget periods after the first is generally the same as the initial award

amount subject to any offset with funds unused in the previous budget period.
