**Ihsan Azzam, Ph.D., MD**  
Chief Medical Officer

## **PURPOSE**

The primary purpose of the Nevada 2021 HIV Fast Facts report is to provide statistics and trends on HIV and HIV Stage 3 (AIDS) in Nevada. This annual publication is a reference document for policymakers, program managers, health planners, researchers, and community members who are concerned with the public health implications of this disease. The tables provided in this edition supersede earlier publications.

## **METHODS**

The data used for this report comes from information gathered between January 1, 2021, to December 31, 2021, and was obtained from the enhanced HIV/AIDS Reporting System (eHARS); statistics provided in this publication are based on provisional data. The eHARS database application is provided by the Centers for Disease and Control and Prevention (CDC) and is maintained by the Nevada Division of Public and Behavioral Health (DPBH) HIV Prevention and Surveillance Program (HPSP). The data is collected from medical laboratories, state and local health departments, and other community providers. The HIV case definition for this report utilizes the 2014 CDC Case Definition. Per the CDC, an individual may be diagnosed concurrently with both HIV and HIV Stage 3 (AIDS) within the same year, allowing them to be counted in both the HIV incidence and HIV Stage 3 (AIDS) incidence tables.

## **DATA CHANGES**

The Nevada 2021 HIV Fast Facts includes recent changes to facilitate targeted prevention efforts towards vulnerable populations. These changes include:

- Age Group at Diagnosis
  - Previously reflected age groups <13, 13 to 24, 25 to 34, 35 to 44, 45 to 54, 55 to 64, and 65+
  - Now reflects age groups <13, 13 to 14, 15 to 19, 20 to 24, 25 to 29, 30 to 34, 35 to 39, 40 to 44, 45 to 44, 45 to 54, 55 to 65, and 65+
- Gender Identity in new HIV/HIV Stage 3 (AIDS) Diagnoses
  - Previously not included
  - Now reflects Cisgender Male; Cisgender Female; Transgender, Male to Female (MTF); Transgender, Female to Male (FTM); Sex at birth Male, Gender Unknown; Sex at birth Female, Gender Unknown
  - Rate is not provided as gender identity is not an available variable within population projections

## **DATA CONSIDERATIONS**

Recent improvements in timeliness of death ascertainment and national case de-duplication efforts are reflected within this report's data. These efforts may be more apparent when comparing this report's data to previous Nevada HIV Fast Facts reports.

Data for the years 2020 and 2021 should be interpreted with caution due to the impact of the COVID-19 pandemic on access to HIV testing, care-related services, and case surveillance activities in state and local jurisdictions.

## **TECHNICAL NOTES**

Per the Nevada Administrative Code (NAC) 441A.040, HIV is a reportable communicable disease. As

prescribed by NRS 441A.150, a diagnosis of HIV is reported to the local health authority by providers, medical facilities, and laboratories.

- **Age Group** is defined as the age of the individual at the time of the HIV and/or HIV Stage 3 (AIDS) diagnosis.
- **All other counties** include Carson City, Churchill, Douglas, Elko, Esmeralda, Eureka, Humboldt, Lander, Lincoln, Lyon, Mineral, Nye, Pershing, Storey, and White Pine Counties.
- **Annual % Change** is the percent increase or decrease relative to the number of cases in 2021. Take caution when interpreting percent changes calculated from small case counts because they can be susceptible to high variability and are likely to be misleading.
- **N (incidence rate)** is the measure of disease in the total population.
- **n (incidence rate)** is the measure of disease for a given subpopulation, such as sex, race/ethnicity, age, or full address. The subpopulations may not equal the total incidence rate for the population due to unknown demographics such as sex, race/ethnicity, age, or full address.
- **New HIV diagnoses** are diagnoses counted in eHARS surveillance statistics and include HIV and HIV Stage 3 (AIDS) cases diagnosed in Nevada, both living and deceased. The surveillance data excludes HIV and HIV Stage 3 (AIDS) cases diagnosed in other states but currently living in Nevada. HIV and HIV Stage 3 (AIDS) diagnoses may duplicate case counts if the person was diagnosed with both HIV and HIV Stage 3 (AIDS) in the same year.
- **New HIV Stage 3 (AIDS) diagnoses** are diagnoses counted in eHARS surveillance statistics and include HIV Stage 3 (AIDS) cases diagnosed in Nevada, both living and deceased. The surveillance data excludes HIV Stage 3 (AIDS) cases diagnosed in other states but currently living in Nevada. HIV and HIV Stage 3 (AIDS) diagnoses may duplicate case counts if the person was diagnosed with both HIV and HIV Stage 3 (AIDS) in the same year.
- **Persons living with HIV** include data on persons living in Nevada with HIV (not yet HIV Stage 3 (AIDS)) and HIV Stage 3 (AIDS) based on the current address listed in eHARS. These persons may or may not have been diagnosed with HIV or HIV Stage 3 (AIDS) in Nevada.
- **Provisional data** is data that is not yet complete and may be subject to revision as information continues to be collected and analyzed.
- **Population** is based on the 2021 population projections from the Nevada State Demographer vintage 2020 data.
- **Rate** is the rate of the population per 100,000 persons and calculated by using the 2021 population projections from the Nevada State Demographer vintage.
- **Relative Standard Error (RSE)** This publication contains counts under 12. Please use caution when interpreting the data, as the RSE is greater than 30%.

Source: Division of Public and Behavioral Health, enhanced HIV/AIDS Reporting System (eHARS), (March 2022).

Persons living with HIV include data on persons living in Nevada with HIV (not yet HIV Stage 3 (AIDS)) and HIV Stage 3 (AIDS) based on the current address listed in eHARS. These persons may or may not have been diagnosed with HIV or HIV Stage 3 (AIDS) in Nevada.

\* Rates per 100,000 population were calculated using 2021 population projections from the Nevada State Demographer vintage 2020 data.

\*\*All other counties include Carson City, Churchill, Douglas, Elko, Esmeralda, Eureka, Humboldt, Lander, Lincoln, Lyon, Mineral, Nye, Pershing, Storey, and White Pine Counties.

§Persons Living with HIV indicate any person regardless of HIV staging, including HIV stage 3 (AIDS), living in Nevada in 2021.

Due to rounding, percentages may not add up to exactly 100.0% and certain rate categories may not add up to the total rate.

Source: Division of Public and Behavioral Health, enhanced HIV/AIDS Reporting System (eHARS), (March 2022).

New HIV diagnoses are counted in eHARS surveillance statistics and include HIV and HIV Stage 3 (AIDS) cases where resident county at time of diagnosis is Clark County, both living and deceased. The surveillance data excludes HIV/HIV Stage 3 (AIDS) cases diagnosed in other states but currently living in Clark County. HIV and HIV Stage 3 (AIDS) diagnoses may duplicate case counts if the person was diagnosed with both HIV and HIV Stage 3 (AIDS) in the same year.

\* Rates per 100,000 population were calculated using 2021 population projections from the Nevada State Demographer vintage 2020 data.

Due to rounding, percentages may not add up to exactly 100.0% and certain rate categories may not add up to the total rate.

Source: Division of Public and Behavioral Health, enhanced HIV/AIDS Reporting System (eHARS), (March 2022).

New HIV diagnoses are counted in eHARS surveillance statistics and include HIV and HIV Stage 3 (AIDS) cases where resident county at time of diagnosis is Washoe County, both living and deceased. The surveillance data excludes HIV/HIV Stage 3 (AIDS) cases diagnosed in other states but currently living in Washoe County. HIV and HIV Stage 3 (AIDS) diagnoses may duplicate case counts if the person was diagnosed with both HIV and HIV Stage 3 (AIDS) in the same year.

\* Rates per 100,000 population were calculated using 2021 population projections from the Nevada State Demographer vintage 2020 data.

Due to rounding, percentages may not add up to exactly 100.0% and certain rate categories may not add up to the total rate.

Source: Division of Public and Behavioral Health, enhanced HIV/AIDS Reporting System (eHARS), (March 2022).

Persons living with HIV include data on persons living in Nevada with HIV (not yet HIV Stage 3 (AIDS)) and HIV Stage 3 (AIDS) based on the current address listed in eHARS. These persons may or may not have been diagnosed with HIV or HIV Stage 3 (AIDS) in Washoe County or Nevada.

\* Rates per 100,000 population were calculated using 2021 population projections from the Nevada State Demographer vintage 2020 data.

§Persons Living with HIV indicate any person regardless of HIV staging, including HIV Stage 3 (AIDS), living in Washoe County in 2021.

Due to rounding, percentages may not add up to exactly 100.0% and certain rate categories may not add up to the total rate.

Source: Division of Public and Behavioral Health, enhanced HIV/AIDS Reporting System (eHARS), (March 2022).

Persons living with HIV include data on persons living in Nevada with HIV (not yet HIV Stage 3 (AIDS)) and HIV Stage 3 (AIDS) based on the current address listed in eHARS. These persons may or may not have been diagnosed with HIV or HIV Stage 3 (AIDS) in All Other Counties or Nevada.

<sup>^</sup>All other counties include Carson City, Churchill, Douglas, Elko, Esmeralda, Eureka, Humboldt, Lander, Lincoln, Lyon, Mineral, Nye, Pershing, Storey, and White Pine Counties.

\* Rates per 100,000 population were calculated using 2021 population projections from the Nevada State Demographer vintage 2020 data.

<sup>§</sup>Persons Living with HIV indicate any person regardless of HIV staging, including HIV Stage 3 (AIDS), living in Nevada in 2021.

Due to rounding, percentages may not add up to exactly 100.0% and certain rate categories may not add up to the total rate.

Source: Division of Public and Behavioral Health, enhanced HIV/AIDS Reporting System (eHARS), (March 2022).

New HIV diagnoses are counted in eHARS surveillance statistics and include HIV and HIV Stage 3 (AIDS) cases diagnosed in Nevada, both living and deceased. The surveillance data excludes HIV cases diagnosed in other states but currently living in Nevada. HIV and HIV Stage 3 (AIDS) diagnoses may duplicate case counts if the person was diagnosed with both HIV and HIV Stage 3 (AIDS) in 2021.

\*All other counties include Carson City, Churchill, Douglas, Elko, Esmeralda, Eureka, Humboldt, Lander, Lincoln, Lyon, Mineral, Nye, Pershing, Storey, and White Pine Counties.
