

**Syphilis is on the Rise**  
**Protect Yourself  
and Your Baby**

If you are pregnant, you can pass syphilis to your baby. You need to be tested three times during pregnancy:

- ✓ First visit
- ✓ 28 Weeks
- ✓ Delivery

If you are pregnant, go to a doctor for prenatal care and get tested for syphilis. For more information, call **2-1-1** or visit [Nevada211.org](http://Nevada211.org)
