Terms of Use

- The POLST is ALWAYS VOLUNTARY and may not be mandated for a patient.
- The POLST is intended for the seriously ill or frail, and for whom a health care professional would not be surprised if they died within a year; others should be offered an AD with DPOA-HC designation.
- This medical order is to be honored in all care settings. In-patient order sets should reflect these POLST orders. The POLST is to be followed until replaced by new orders.
- Should a patient have both a DNR Identification and POLST, the most recent order should be followed.
- Photocopied, faxed or electronic versions are valid as long as required signatures (Section E) are included.
- When comfort cannot be achieved in the current setting, the patient should be transferred to a setting that is able to provide comfort.

Completing a POLST

- If a patient lacks decisional capacity, their legal representative (DPOA-HC, guardian or parent of a minor) may complete a POLST. If the patient has no legal representative *and* lacks decisional capacity, then a surrogate may complete a POLST for the patient. Surrogates are (in this order): a spouse, the majority of adult child(ren), parent(s), a majority of adult sibling(s), the nearest other adult relative of the patient by blood or adoption who is reasonably available, or "an adult who has exhibited special care or concern for the patient, is familiar with the values of the patient and willing and able to make health care decisions for the patient."
- A POLST does not replace an Advance Directive. An AD may designate a decision-maker (DPOA-HC) in the event the patient becomes incapacitated, documents additional treatment preferences and should be encouraged to be completed. Always check for inconsistencies between End-of-Life documents and make corrections as appropriate.
- Completion of a POLST should follow a discussion of the patient's goals, values and how their treatment preferences will impact both their longevity and quality of life.
- Any section not completed creates no presumption about the patient's preferences for treatment for that section.
- Patients discharged home should place the POLST next to their bed or on their refrigerator where EMS is trained to look.

POLST Review - This POLST should be reviewed periodically, and if:

- The patient is transferred from one care setting or level to another, or
- There is a substantial change in patient health status, or
- The patient's treatment preferences change.

Voiding POLST

- If the patient has decisional capacity, only the patient may void a POLST.
- Without decisional capacity, the patient's legal representative may revoke a POLST, or the patient's surrogate may revoke the POLST *only* if the POLST was completed by the patient's surrogate (see Completing a POLST, first bullet, above).
