Meeting Dosimetry Regulation Requirements

The Radiation Control Program (RCP) held a very interactive and successful Stakeholders Meeting on June 22, 2016. There was an unprecedented attendance, with open discussion on regulations and guidance.

The RCP has received many comments and questions about the dosimetry forms available for use and the applicability to each.

Licensees and registrants can review Nevada Administrative Code (NAC) 459.337, 459.339, 459.3355, and 459.3665 for basic requirements. For annual and lifetime cumulative requirements, review NAC 459.365 and 459.786.

The regulations can be found on the RCP website at http://dphh.nv.gov/Reg/Radiation_Control_Programs/.

DID YOU KNOW?

Updated Dosimetry Forms for Licensees/Registrants

Occupational Dose Record For A Monitoring Period (at least annually)

Cumulative Occupational Dose History: Lifetime Cumulative Dose
or Prior Occupational Dose for Current Year

For more details visit [http://dphh.nv.gov/Reg/RAM/dta/Forms/Radioactive_Material_Program_\(RAM\)_-_Forms/](http://dphh.nv.gov/Reg/RAM/dta/Forms/Radioactive_Material_Program_(RAM)_-_Forms/)

If you have lost or stolen radioactive materials (RAM) or a radiation producing machine (RPM), you should contact the RCP immediately to assist in the investigation and make appropriate reporting to national, state and local partners.

Stakeholders Communication

The RCP develops a quarterly newsletter and holds semi-annual stakeholders meetings. The next scheduled stakeholders meeting will be in December 2016 and the RCP is open to suggestions for meeting topics.

Email topic suggestions to radiationcontrolprogram@health.nv.gov.

To add or remove your name from our listserv, go to http://dphh.nv.gov/Reg/Radiation_Control_Programs/.
