The state business license and certificate of exemption are required in addition to any applicable county, city, or other local business licenses.

Effective September 30, 2023, the Radiation Control Program will require all radioactive material licensees, radiation producing machine registrants (including mammography) and service providers for radiation producing machines to upload their state business license or a certificate of exemption into the Radiation Control Program Online Licensing System. All licensees, registrants and service providers are encouraged to upload their state business license before September 1, 2023. The state business license can be uploaded into your Radiation Control Program Online Licensing System account at:
